

## HIGH BAY PALLET RACKING

for AS / RS

*Efficiency through height!*

A warehouse high bay pallet racking system operated by cranes requires special arrangements for tolerances in manufacturing and assembly. Perfect positioning & leveling are vital for such installations. The cranes are running on a floor mounted rail and stabilized at the top of the mast by a top guide rail. The pallets can be placed in 'single deep,' 'Double deep' or 'Multi-deep' patterns.

At one of the rack ends, the entry & exit conveyors are installed.

High Bay racking systems are used for storing large quantities of high throughput goods.

### 'Jay' High-Bay Pallet Racking for Stacker Crane for AS / RS

#### Applications

- Manufacturing Areas
- Stores & Warehouses
- Finished Goods area
- Raw material & WIP Area

#### Advantages

- ➔ Utilisation of storage space to full height
- ➔ Ideal for large article numbers & medium to high turnover
- ➔ Reduction in the use of conventional buildings
- ➔ Picking from all levels of the racks
