design capabilities, R & D, stringent Quality testing and more.

requirements. Our manufacturing facility comprises of state-of-the-art infrastructure, in-house geared to hone out expertise, offer specialized solutions with more attention to client With complete backup of our parent company - JAY EQUIPMENT & SYSTEMS PVT LTD, we are

after brand for their storage solutions and services.

in various industrial sectors in 20+ countries, JAY STORAGE SOLUTIONS have been a sought virtual but rich experience of more than 30 years now. Having executed more than 6000 projects From business division to self-dependent company, JAY STORAGE SOLUTIONS PVT LTD has

## About Us

## Strengths & Capabilities

Manufacturing Capabilities up to 35mts height  
Offers more than 30,000 standard items  
Developed India's first AS/RS (Automated  
Storage & Retrieval System)

## Pallet Racking

Pallet Racking Sytems is a material handling aid system designed to store materials on pallets. Lift trucks are usually an integral part of any pallet racking system as they are usually required to place the loaded pallets onto the storage.

## Mezzanine Floors

This type of storage systems adds more space to the warehouse to stack items high up. Mezzanine floors take maximum advantage of the height of premises, doubling or tripling the surface area. Mezzanine floors are totally dismountable & reusable & their structure, dimensions & location can be easily modified. Mezzanines can also be supported on Racks

- Conventional Pallet Racking
- Narrow Aisle Pallet Racking
- VNA Racking
- High Bay Pallet Racking for AS/RS
- Double Deep Pallet Racking
- Drive - In/Drive - Thru Pallet Racking
- Radio Shuttle Pallet Racking
- Radio Shuttle Pallet Racking for AS/RS
- Mobile Pallet Racking
- Pallet Live Storage
- Push-Back Racking

- Mezzanine Floors -UBe Series
- Mezzanine Floor - SiG Series
- Rack Supported Mezzanines

## Shelving & Picking

Shelving systems are designed for warehouses where goods are deposited & removed manually from shelves. Specific systems can be so designed so as to use the vertical height of the warehouse, still giving the flexibility for manual access. With the use of 'Vertical reciprocating conveyors','Electric Lifting Platforms' storage/retrieval from the higher reaches on storage platforms is made easy. The system also makes optimal use of the warehouse. The higher levels can also be accessed mechanically by devices that lift the operator to required height (i.e stacker cranes or order picking fork-lift trucks) or via gangways located between shelves. Various accessories allow for the division of levels & placement of boxes to classify individual products, folders, etc.

## Automated Warehouse

Automated solutions for managing & optimizing the storage, preparation & dispatch of goods. Automated Storage Systems refers to any type of storage equipments in the warehouse that are automated to stack items high up.

- Automated Storage Retrieval Systems (AS/RS) for Pallets
- Automated Storage & Retrieval Systems (AS/RS) with Radio Shuttles
- Automated Storage Retrieval Systems (AS/RS) for Special Loads
- Mini - Load AS/RS
- Radio Shuttles

- Long Span Shelf Racks
- Boltless Long Span Shelving
- High Bay Shelving for AS/RS
- Multi - Tier Long Span Shelving Systems
- Multi - Tier Boltless Long Span Shelving
- Mobile Shelving
- Compactors
- Flow Racks
- Rivet Shelving
- Slotted Angle Racks
- Multi - Tier Slotted Angle Shelving

## Cantilever Racking

This systems are ideal for the safe & organised storage of long & heavy loads. Some of them are also suitable for storing boards, metal sheets or large and valuable items such as crates or boxes & even white goods.

- Cantilever Racking
- Multi - Tier Cantilever Racking
- Mobile Cantilever Racking

## Other Systems

'Jay' offers various different types of storage that can be adaptable to individual requirements.

- Drive - In/Drive - Thru Reel Storage
- Metal pallets
- Metal Cage Bins
- Rack Supported Warehouses (Silo)
